Comments: It's too un logical that legislators of our land have made such a malicious decision. The president advised that we should fight an organized war! The schools closed because they cannot observe social distancing. What loss do they suffer if We study online? Where does the virus pass if a lawyer is studying from home? Stop disorganizing us. We are very comfortable studying online. Big ups our Director for embracing change and technology. Advise our MPs that the world is dynamic. Success lawyers

47. Name: MAFABI shaidu on 2020-06-18 20:53:51
Comments: Some of us, had already traveled back, to our rentals/hostels for the same, the more they prolong our stay at @LDCUganda the more expenses we are to incur, will the government foot our bills. Times have

changed we should embrace technology.

Comments: Please let us embark on online studying. Personally i was benefiting from it. We need to accept covid 19 is here to stay and embrace the new normal. Those who can't access online learning should be given the opportunity to finish the course with the next 2020-2021 intake and put the 2 terms they have covered in consideration. We all cannot finish at the same time. Life has to move on. Do not let our heads rust.

78. Name: Samuel Nsubuga on 2020-06-18 21:08:05
Comments: Online teaching is the way to go. unlike our fellow students in primary and secondary levels who' re in TVs and radios, LDC students are to embrace more advanced technology to study. Let our leaders in the country only encourage us there's no solution in stopping us instead

79. Name: Ashaba Arnold on 2020-06-18 21:08:07
Comments: The Parliament and the Ministry of Education are stopping our online classes thinking they're favouring us the students. We dint need the favour. We're okay with our online classes.

Comments: We should keep going embracing the New Normal.

83. Name: Namanya Urban on 2020-06-18 21:10:23
Comments: parliament should get concerned with more serious issues that it is used to like locusts. LDC is governed in a different way. Not like secondary schools or universities.
No student at LDC is achieved with online studies. That MP who got concerned with us as if he has satisfied all the need of his constituent should get data first. We are ok with online studies.

84. Name: Ayebare Proscovia on 2020-06-18 21:10:31
Comments: It is a shame that in the present day and era a member of Parliament, who otherwise should be current on world trends so as to be able to enact relevant legislation is instead the first one to oppose digitalisation.
He should be honourable and disclose his source of of his falsehoods. Am so ashamed on his behalf.
We want to study on line. This petition is on line. Can a students who near touche d a computer during his school days find confidence to prepare a petition on line?
LDC IS A PLACE Where the teaching style very easily blends with online classes.
Did the MP research or he just woke up and

87. Name: Kiiza Aloysius on 2020-06-18 21:12:48
Comments: eLearning is the only way we can embrace in these unprecedented times where the world is grappling with covid-19.
The system has been tasted by the LDC and students agreed to it.
It's a new normal we must adapt.
I totally disagree with the mp who raised the matter and pray the MoE&S should let LDC conduct online classes.
Thanks

Comments: So, who told them that all primary and secondary school pupils and students are not in hard to reach areas? Yet it's the same ministry that arranged for them to study and conduct lessons on Radios and TVs when actually in villages some parents, have no radios, TVs, or even don't have smart phones to help them access online education materials thereon.

Is it not the same ministry that has invested heavily in this arrangement to help our young brothers and sisters, Or parliamentarians want to tell us that they are not aware? It's actually cheaper if they want to, to help buy a smart phone and data for each LDC student just and only to help us finish our course given the fact that the number is small compared even to a single university or primary and secondary schools combined! The government is advocating for investing in science and technology, is this not part of such a program?

If that is not the case why should the ministry bother itself buying computers for schools?

This is a new world order that actually, the post corona virus era shall strongly embrace. We shall not remain the same, believe it or not! If that is the case then should sue the ministry of education because it is the same ministry that started the arrangement ant LDC had to pick from their! May be they want to tell us that they thought it wrongly to have started the arrangement. Let them not even think about it, if they don't want to regret.

We have all the evidence against them!

Comments: LDC as an institution is following the presidential directives of not crowding in one place during class programs to prevent the easy spread of the virus and so opted for easier and more healthy means through using online programs like zoom moodle and email. Parliament on the other hand would rather conduct online election campaigns and chose to curtail online studies, its a great shams.

Comments: The absurd decision is going to cause more harm to us as students. Rent arrears increase, tutuon remains the same, monthly or weekly data that was bought for classes is going to waste, some students that had travelled back to Mbarara and some to Kampala for books and concentration are now strunded, everythin is now at a standstill and this uncertainty is really frustrating. We need to finish this course and move on with other things. It's night time we embraced the new normal and like H.E the president said, we shouldn't expect the usual in unusual circumstances.

Whoever is contesting this initiative should enroll for an online course first with any institution before they draw uniformed stipulations about something they surely have no idea about.
It's unfortunate that when some members of parliament were given electronic gadgets, instead of putting them to good use and learn something, they played cards.
We a students who are very awake to the new environment around us and doing our best to achieve a qualification despite the hindering circumstances.
Success is for strong not the weak.

Comments: Covid 19 is one of the saddest things that have forced the whole world to embrace sudden "CHANGE",as the only way to avoid stagnation.The few weeks of LDC online learning have been an eye opener and a success.I am alive to the challenges that are associated with online learning,to wit ,network glitches,data costs ,etc. LDC put in place a moodle platform to which all academic recorded sessions are uploaded, and accessible by all students ,as a measure to address the challenges mentioned above. I undoubtedly embrace the LDC online learning and strongly believe it's the only way to go ,not only for LDC,but other academic and non academic institutions as well ,including Government departments.No person can, with absolute certainty determine ,how soon the cure or vaccine for covid 19 can be made available and accessible to all the people.The LDC online learning system embraces social distancing and offers no further opportunities for the spread of the virus. As students,we are comfortable with the online learning system for our own good ,and for the good of our successors (students).We need not fear change,but embrace it and learn to live with same.I support and append my signature to this petition .KOSEMO .R.DOUGLAS

Comments: All Ugandans are aware of the Covid 19 pandemic, and it is well evidenced that people have well adhered to the guideline from all the key planning sectors. However this does not take away the rights of organised societies to proceed with such activities that matters in their lives, as long as there is in agreement with the Covid 19 pandemic preventive guidelines. With such a background LDC did a consultation from students on whether it's convenient and affordable to have the online classes ? Of which it was very well supported. In respect of the ministry of Education's plans LDC is one institution in Uganda with a very unique academic calendar and we'll organisation if I may term it from other institutions of learning in Uganda. Therefore it should be looked in isolation and let to take up its course as long as there is strict adherence to the Covid 19 pandemic preventive measures.

How many students of LDC has been succumbed to Corona virus as a result of this online studies being conducted by the LDC?
How much money has been put by government to facilitate this kind of leraning that can make this politicians to complain about our studies?
Which law and directives from the president and ministry of health been contravened by LDC ?
We must learn to be appreciative for ideas that can make Uganda grow.
This is an indication that some members of parliament are anti development for this country.
Therefore I totally surport on-line studies to continue just for the betterment of brighter future of Ugandan assets.

Comments: Online studying was an idea tabled by the students to the LDC administration through the students' leadership body.
The Administration adopted the idea after conducting a 2 week pilot study which was greatly attended by the students.

Guidelines were further shared with us and they included specifically;

- Exams shall not be conducted online.

This was in line with the president's advice in regard to online exams "UCU online exams"

It thus my voice and desire to embrace the new normal through supporting LDC online classes.

Comments: Ugandan MPs should know that its only God who is the same yesterday today and forever. Hebrews 13:8 the rest of the things can't be the same.

Your the reason our country is still lagging behind .

Dear MPs won't you embrace the changes that happen in our society including our learning online as LDC students. If you believe that Uganda should be static in all generations then you have lost truck.

We are not complaining as students about MBS and network just like how we have embraced the new idea of wearing masks and staying at home.

- The classes are also conducted in line with the MoH guidelines on preventing the spread of COVID19.
- Stopping LDC from conducting online classes shows how we are careless in this country in as far as the future of education is concerned.
- Please allow LDC continue with the online classes.. So far, they were successful and none of the students was complaining..

Comments: I'll start by recognizing @Min. of Educ. & the August House for being the No. 1 enemies of this progress.

But since this is a petition, let me add my voice too.

I take cognizance of the fact that these are changing times, w/c we'all had not prepared for; times when everything would change " & go tech".

The pandemic as well as the preceding Public Health (Control of COVID - 19) Rules, 2020 which power to make them, Parliament played a part and gave the power to the Minister(See. section 104 of the Public Health Act Cap 281) brought about all these changes.

This was followed by LDC halting academic activities(Till further notice) in adherence of the same. Now herecomes the time, when lectures can be conducted online where we the students have welcomed and appreciated the cause, & success is registered in attendance than the August House, & Min. of Education, now stops the same.

These online classes are so help to us and we therefore need them since with No Sacrifice, there's no victory.

I believe decisions to be taken, are supposed to represent the views, interests & wishes of the people (those affected), and we the people allude to the fact that these classes should continue.

I may not know who will read this, but let above mentioned bodies keep their politics outside of this since this is not the play ground for it.

Comments: The online teaching system is by all means necessary for us as bar course students to continue learning during this period seeing as we have lost three months due to the Covid impediment.

Additionally and very importantly,the talk of high data expenses is false because we spend less than half of what we normally spend as daily upkeep while physically present in school.So it's even safe to argue that online teaching has offered as a cheaper solution to studying and completing our course.

Comments: We are fine with the method, we got 5 weeks of revision online and this boosted our experience to hold real lectures on the same, I believe unlike other institutions..LDC is much sure that it's students are all having the gadgets to access these online classes like smartphones and computers since these were even stated on our admission letters as a must have, the program is much cheaper than being at school forexample I have only used 9GB data for the whole month to access all the required classes which has only costed me 30,000/=, there's is no parent who afforded sending a student to LDC and paid all that costs from undergraduate who can't now afford that 30k for data subscription, secondly the Honorable's assertion that LDC is demanding 20k from students for this exercise..this should be disregarded, he is speaking from no basement, am a student at LDC and I have never heard abt that, For my case LDC classes online are very fine

Comments: It is incumbent on our National leaders to first research about something before tabling it on the follow of parliament, thus it is on that note that Hon Okupa did not take time to get views of the LDC student leaders as regards to online studies. I therefore disregard the submission of Hon Okupa that LDC as an institution is collecting 20,000shs for the online studies, no it's a mere sham and the public should treat it with the highest contempt.

Being a postgraduate institution, students have the abilities of financing their online studies, and also the students have adhered to government guidelines of social distancing by staying at their respective homes.

I therefore urge the Parliament of Uganda through the Right. Hon. Speaker to give leverage to LDC students to finish their course basing on the fact that they are finalists.

It is used even in other countries, what about Uganda, Judiciary introduced online filling and court hearings in prison, as lawyers we have moved a head of the rest, please let us be. In the alternative, LDC is a unique institution from the rest and am sure you have notice of this, as bar course student I wish to report that we agreed to go this way, so please allow us to complete our course and we go, we are out of time. Thank.

Comments: Online study by LDC is in tand email with social distancing.
All students as a policy were required to possess laptops and no one was admitted without showing it to administration, we have used IT in the names of email to receive all our academic materials, WiFi and now Zoom, Moodle for classes.
LDC has over 1500 students who cannot find enough room to sit taking into account the 4 metres distance rule, even if we open physically meaning online.
Online study is cheaper, I don't need to spend on transport (30000 daily), lunch, break, water (15,000).
Minimises time wastage, I spend over 2 hours going to school and slightly longer on my way back home because of endemic traffic jams. Now part of this time is used to review my work.
Online facilities offer flexibility, allowing to take my pace and be in control of what and when I should learn.
LDC also saves money that it would commit to staff welfare on campus and the power consumption on AC and the like.
The online learning fits into the Ministry of Education policy of providing online education. See the Ministry's COVID 19 Education Sector Response Guidelines, para. 2.1.4.
Question: What if Covid 19 becomes a permanent feature in our lives, shall we then close schools permanently?
If public taxis, restaurants, mauls, shops, markets have physically opened, is it just to close online studies?
What else must I say for any one to see a bleeding heart???

Comments: I am in support of e-learning because I am actually gaining more than I do when I do self study. Secondly, if a person has to succeed in law learning, you need to be engaged in learning daily if parliamentarians stop us from the same most of us will be forced to engage in other works and by the time we begin school again no one will be remembering even a single procedure to follow when we resume. Thirdly, we don't have the same background; most of us are not well off and moreover hostels keep on demanding rent even when we are home apparently. This is very unfair to us students unless we keep on studying and finish in time hence saving us from the burden of paying hostel rent in vain. That's my humble petition and I pray it should be considered.

Comments: E.learning is the cheapest mean of acquiring knowledge in Uganda this is because ;
1 .Accessing data and wifi is cheap and easy due to telecommunication Companies competition and an increase of data dealers,but physical appearance is expensive whether you own a vehicle, a bicycle, motorcycle, currently transport costs are high due to half rule capacity of each public vehicle and remember no more use of boda boda by passengers, unless your ready to convert yourself into a luggage .
2.flexibility ,Ldc has Kampala and mbarara campus which E.learning ease interaction of different firms of different campus. On addition to that mbarara is a boarder district one will wonder since the president stopped movement of vehicle in such area,how will students access Mbarara lectures and there cubicles ?!?!?!
this means this will affect more students negatively than the less negative effects if any which I can't see now by E.learning .

I therefore support the E.leaning than the long ,unpredictable physical learning in the country yet this is the source of essential workers.

Comments: I think the LDC students should have been consulted first before making a decision.I mean we are adults beyond universities and some students at LDC are mps. We were never asked to pay any money and we are totally willing to do online classes. So please

Comments: Online lecture is so wonderful and above Ldc is research centered and there is enough time to carry out the research .
Whoever complained to parliamentary is merely missing guiding them on whatsoever he or she is telling them.
I therefore pray that you let us continue studying.
Thanks

Has got most of the students in place where they never expected to be a d more the resources at this point can't only support them to sustain their living and now when put up with the education conditions it won't be easy for them and more so they are not even earning any money to sustain them with more data
